SAFETY DATA SHEET

1. Chemical product and company identification

Product name: Multilon® TN-3813BW
SDS Number: TN3813BW-JpE
Version number: 01
Issue date: 04-01-2013
Revision date: -
Company name: TEIJIN Limited.
Address: 2-1, Kasumigaseki 3-chome, Chiyoda-ku, Tokyo 100-8585, Japan
Division: Environment Quality Assurance Department, Resin & Plastic Processing BU
Telephone number: +81 3-3506-4717
Fax: +81 3-3580-6680

Recommended use of the chemical and restrictions on use
- Intended use: Molding material for industry use

2. Hazards identification

GHS-classification: The product is not classified according to GHS.
GHS label elements: None.
Precautionary statement: None.
National/local information: See section 15 for regulatory information.

3. Composition/information on ingredients

Substance or Mixture: Mixture

Chemical formula: (C15H16O2.CCl2O)x (25971-63-5), (C8H8.C4H6.C3H3N)x (9003-56-9), H2-O3-Si 3/4Mg (115-86-6), C18-H15-O4-P (14807-96-6)

Composition comments: Triphenyl phosphate is classified as GHS hazardous to the aquatic environment (acute and chronic) category 1. However, because the test result on a similar product showed low water extractivity of triphenyl phosphate (OECD GUIDELINE FOR TESTING OF CHEMICALS 120), the bioavailability of triphenyl phosphate in this product is expected to be low and the environmental hazard of the product is considered to be low.

4. First aid measures

If inhaled: In case of inhalation of dusts or fumes from heated product: Move injured person into fresh air and keep person calm under observation. Get medical attention if any discomfort continues.

If on skin: Rinse with water. Get medical attention promptly if symptoms persist or occur after washing. If burned by contact with hot material, cool molten material adhering to skin as quickly as possible with water, and see a physician for removal of adhering material and treatment of burn.

If in eyes: Dust in the eyes: Do not rub eyes. Flush thoroughly with water. If irritation occurs, get medical assistance.

If swallowed: Rinse mouth thoroughly. Large quantities: Get medical attention if symptoms occur.

Expected acute and delayed Symptoms: Talc may have effects on the lungs, resulting in talc pneumoconiosis.

Protection of first-aid responders: First aid personnel must be aware of own risk during rescue.

Notes to physician: Treat symptomatically.
5. Fire-fighting measures
Extinguishing media
Extinguish with foam, carbon dioxide, dry powder or water fog.

Extinguishing media to avoid
None.

Specific hazards
During fire, gases hazardous to health may be formed.

Special fire fighting procedures
Use standard firefighting procedures and consider the hazards of other involved materials.

Protection of fire-fighters
Selection of respiratory protection for fire fighting: follow the general fire precautions indicated in the workplace.

6. Accidental release measures
Personal precautions, protective equipment and emergency measures
Avoid inhalation of dust. See Section 8 of the SDS for Personal Protective Equipment.

Environmental precautions
Do not allow to enter drains, sewers or watercourses.

Clean-up methods and materials and containment measures
Collect and dispose of spillage as indicated in Section 13 of the SDS.

7. Handling and storage
Handling
Technical measures
Use explosion-proof electrical equipment if airborne dust levels are high.

Local and general ventilation
Provide adequate ventilation.

Precautions
Use work methods which minimize dust production. Wear appropriate personal protective equipment.

Safe handling advice
Avoid inhalation of dust. Avoid prolonged or repeated contact with skin. Avoid vapors from heated materials to prevent exposure to potentially toxic/irritating fumes.

Storage
Technical measures
Avoid dust formation.

Suitable storage conditions
Store in closed original container in a dry place.

Safe packaging materials
Keep in original container.

8. Exposure controls/personal protection
Occupational exposure limits
Japan. OELs - JSOH. (Japan Society of Occupational Health: Advisory Opinion on Permissible [Exposure] Limits)

Components | Type | Value | Form
--- | --- | --- | ---
Talc (14807-96-6) | TWA | 2 mg/m3 | Total dust.
 | | 0.5 mg/m3 | Respirable dust.

US. ACGIH Threshold Limit Values

Components | Type | Value | Form
--- | --- | --- | ---
Talc (14807-96-6) | TWA | 2 mg/m3 | Respirable fraction.
Triphenyl phosphate (CAS 115-86-6) | TWA | 3 mg/m3 |

Engineering measures
Provide adequate ventilation. Observe occupational exposure limits and minimize the risk of inhalation of dust and fumes.

Personal protective equipment
Respiratory protection
Wear respirator if there is dust formation. When the product is heated, use suitable respiratory equipment with gas filter for organic gas.

Hand protection
For prolonged or repeated skin contact use suitable protective gloves. When material is heated, wear gloves to protect against thermal burns.

Eye protection
Use tight fitting goggles if dust is generated. If contact with hot material may occur, safety glasses and face shield are recommended.

Skin and body protection
No protection is ordinarily required under normal conditions of use.

Hygiene measures
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties
Appearance
Physical state
Solid.
Form: Pellets.
Color: Natural.
Odor: None.
pH: Not applicable.
Melting point/Freezing point: Not available.
Boiling point, initial boiling point, and boiling range: Not applicable.
Flash point: Not available.
Auto-ignition temperature: Not available.
Combustion characteristics (solid, gas): Not available.
Flammability limit - lower (%): Not available.
Flammability limit - upper (%): Not available.
Vapor pressure: Not applicable.
Vapor density: Not applicable.
Specific gravity: 1.21
Solubility: Insoluble in water
Partition coefficient (n-octanol/water): Not available.
Decomposition temperature: Not available.

10. Stability and reactivity
Stability: Stable under normal temperature conditions.
 Possibility of hazardous reactions: Will not occur.
Conditions to avoid: None known.
Incompatible materials: No data available.
Hazardous decomposition products: During combustion: Carbon monoxide, Carbon Dioxide, Acrylonitrile, Hydrogen cyanide, Nitrogen oxides (NOx), Phosphoric acid.

11. Toxicological information
Acute toxicity: May cause discomfort if swallowed.

Skin corrosion/irritation: Dust may irritate skin.
Serious eye damage/eye irritation: Dust in the eyes will cause irritation. May cause redness and pain.
Respiratory sensitizer: None known.
Skin sensitizer: None known.
Germ cell mutagenicity: None known.
Carcinogenicity: Not classified.

IARC Monographs. Overall Evaluation of Carcinogenicity
Acrylonitrile butadiene styrene resin (CAS 9003-56-9) 3 Not classifiable as to carcinogenicity to humans.

ACGIH Carcinogens
Talc (CAS 14807-96-6) A4 Not classifiable as a human carcinogen.
Triphenyl phosphate (CAS 115-86-6) A4 Not classifiable as a human carcinogen.

Toxic to reproduction: None known.
Specific target organ toxicity - single exposure: None known.
Specific target organ toxicity - repeated exposure: None known.

12. Ecological information
Ecotoxicological data

Company name: TEIJIN Limited.
Version #: 01
Revision date: -
Components | Species | Test Results
--- | --- | ---
Triphenyl phosphate (CAS 115-86-6) |  |  
Aquatic |  |  
Crustacea | EC50 | Water flea (Daphnia magna) 0.86 - 1.2 mg/l, 48 Hours  
Fish | LC50 | Rainbow trout, donaldson trout (Oncorhynchus mykiss) 0.3 mg/l, 96 Hours  
Fathead minnow (Pimephales promelas) 0.87 mg/l, 96 Hours  

Ecotoxicity
Triphenyl phosphate is classified as GHS hazardous to the aquatic environment (acute and chronic) category 1. However, because the test result on a similar product showed low water extractivity of triphenyl phosphate (OECD GUIDELINE FOR TESTING OF CHEMICALS 120), the bioavailability of triphenyl phosphate in this product is expected to be low and the environmental hazard of the product is considered to be low.
The product components are not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Persistence/degradability
None known.

Bioaccumulation
None known.

Mobility in soil
The product is insoluble in water and will sediment in water systems.

Other hazardous effects
None known.

13. Disposal considerations
Residual waste
Dispose of waste at a facility with special permission to dispose industrial wastes. Waste should be accompanied by a manifest for the industrial waste. Dispose of in accordance with local regulations. Do not discharge into rivers, lakes, mountains, etc. because the product may affect the environment.

Contaminated packaging
Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. Transport information
International regulations
Not regulated as dangerous under UN transport regulation.
IATA
Not regulated as dangerous goods.
IMDG
Not regulated as dangerous goods.

15. Regulatory information
Industrial Safety and Health Act
Specified substances regulation Not regulated.
Organic solvents regulation Not regulated.
Notifiable substances Triphenylphosphate 8.5 %
Labeling substances Not regulated.

Poisonous and Deleterious Substances Control Act
Not regulated.

Act on the Evaluation of Chemical Substances and Regulation of Their Manufacture, etc.
Class I specified chemical substances Not regulated.
Class II specified chemical substances Not regulated.
Monitoring chemical substances Not regulated.

Law concerning Pollutant Release and Transfer Register
Specified class 1 substances (substance name, ordinance number and content) Not regulated.
Class 1 substances (substance name, ordinance number and content) Triphenylphosphate Ordinance No. 461 8.5 %
Class 2 substances (substance name, ordinance number and content) Not regulated.

Fire Service Act
Not dangerous goods under Fire Service Law

Ship Safety Law, Dangerous Goods Marine Transport and Storage Rule
Not regulated.

Air Law, Enforcement Rule
Not regulated.

Explosives Control Act
Not regulated.
High Pressure Gas Safety Act  
Not regulated.

Act on Prevention of Marine Pollution and Maritime Disaster  
Not regulated.

Water Pollution Control Act  
PHOSPHORUS

16. Other information
The information about colorant is not contained in this SDS.
This information is provided without warranty. The information is believed to be correct. The precautions in this SDS are intended for normal use. Please take safety measures appropriate to the use and the application when handling the product in a special way. This information should be used to make an independent determination of the methods to safeguard workers and the environment.
